Dear FCC:

I had a hard enough time when I became disabled and could not work. I lost my job and have bad credit so I'm not able to afford the ATT's and other cell phone services. Tracfone is the only kind I can afford on a pay as you use it. So your proposed increase is unfairly targeting me. I need this service for emergencies when on the road.

Thank you for your prompt attention to this matter. Please provide a written response indicating the status/resolution of this matter.

Very truly yours,
